

WHS Risk Management

Proactively managing risks to keep every workplace safe, compliant, and resilient.

Synopsis

This course is suited to local government supervisors and managers who may be involved in supervising the risk management process, staff and contractors within an organisation. The aim of the course is to provide participants with a basic understanding of the risk management process as required by legislation and relevant codes of practice. This course provides the skills and knowledge required to identify risks and to apply established risk management processes to operations within each person's area of responsibility

Course Topics:

- Understand risk management
- Understand legislation and risk management
- Learn about hazard, risk, risk matrix, risk registers
- Learn about risk assessments, job safety analysis, safe work method statements
- Understand hierarchy of control

Learning Outcomes:

- Explain the difference between the terms "hazard" and "risk" Analyse the organisational environment to identify the existing and potential hazards using an appropriate classification and analysis method
- Conduct risk assessments of identified hazards using appropriate risk assessment methodology
- Use the hierarchy of control to adequately manage exposure to the risk
- Understand the issues relating to implementation of appropriate control measures
- Understand the methods or review and monitoring of the overall process
