SHORT COURSE

Managing Projects using AI

Using ‘business think’ to create a problem-solving machine.

Synopsis

This cutting-edge course is designed for forward-thinking Project Managers who want to harness the transformative power of Artificial Intelligence to streamline planning, boost team performance, and make smarter, data-driven decisions.

Whether you're managing complex infrastructure, leading agile teams, or navigating stakeholder dynamics, you'll discover how AI tools (from estimating time and cost to intelligent scheduling) can elevate your impact and efficiency. Join us to future-proof your skillset, unlock new possibilities, and lead with confidence in a rapidly evolving digital landscape.

Topics Include:

- Creating a ‘Work Breakdown Structure’ using AI.
- Estimating project schedule.
- Estimating project cost.
- Allocating resources using AI.
- Risk Assessment and mitigation using AI.
- Analysing lessons learnt and applying these to current projects.
- Creating a Communications Plan.
- Managing stakeholders.
- Creating meeting agendas.
- Summarising and analysing meetings and messages.

Our trainers

Our specialist facilitators bring years of Local Government training experience to guiding and inspiring participants, helping them build confidence and capability across a wide range of disciplines. Join us for this lively, instructor-led, interactive, and practical course designed to enhance skills and support participants in navigating real-world challenges.

Audience

- Project Managers
